13.	Customer Care Division ( Complaints ) Street Lighting ( Complaints )	---	57

Brihanmumbai Electric Supply and Transport Undertaking (BEST) distribute electric supply within the old city limits of Mumbai and runs Public Transport in the Greater Mumbai region. This write up is about the Disaster Management Plans for the Electric Supply Distribution.

## 2. **Introduction:**

BEST received power from M/s TATA Power Co. through State Transmission Network at 110 kV, 33 kV or 22 kV and distributes the Energy from Colaba to Haji Ali / Byculla / Mumbai Central in South Zone and Mumbai Central / Byculla / Haji Alito Sion, Chunabhatti / Mahim in North zone as shown in **Annexure – I.** A map showing the power system arrangement is attached as **Annexure –II.** The statistical data of Receiving Substations, Distribution Substations, Cables & Consumers etc. in Electric Supply Division as on 31<sup>st</sup> March 2025 is as follows :-

Description	Numbers
Nos. of Receiving Substations	65
Nos. of Power Transformers	165
Nos. of Distribution Substations	2559
Nos. of Distribution Transformers	3503
Length of Cable ( EHV / HV / LV in kms )	12562 Kms.
Nos. of Consumers in Lacs	10.57

To avoid failure of electric supply even for few minutes, BEST has evolved very systematic and time-tested procedures and arrangements for attending to all types of breakdowns.

It is our experience that major floods occur in Mumbai once or twice in Monsoon Season, when an innumerable breakdown occurs. In such cases, we divert officials from other non-emergency departments to deal with the situation. The BEST operation and maintenance system is capable of dealing with the increased breakdowns, though the restoration of supply takes some more time during disaster situation such as flood & fire.

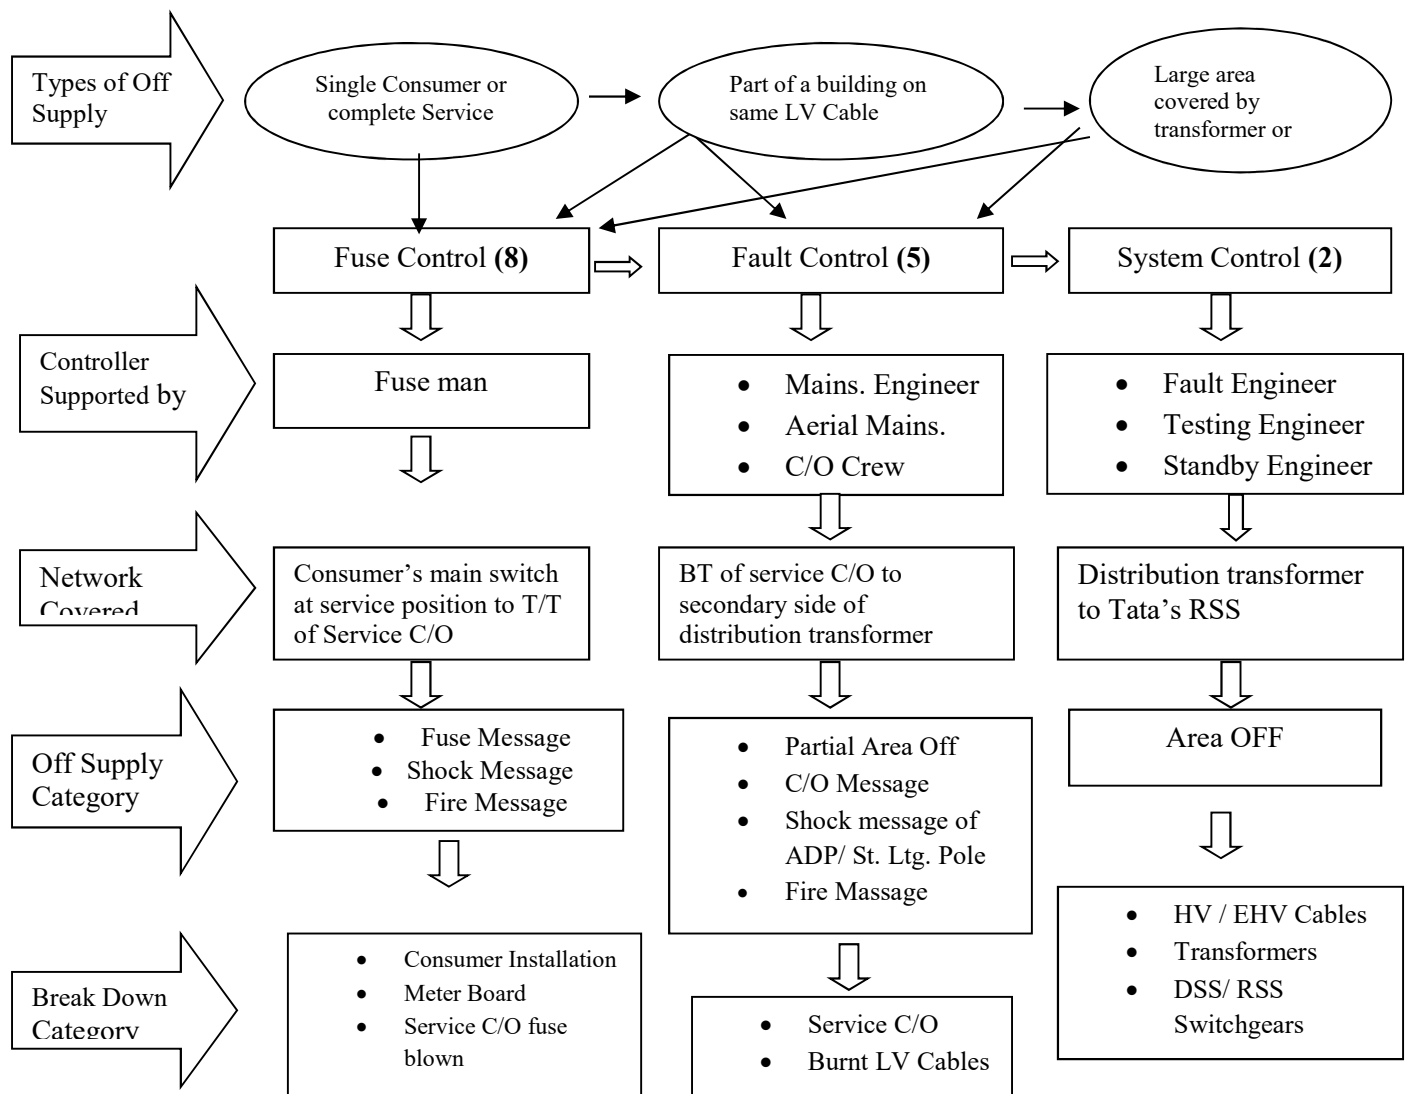

Also, in cases such as floods, fire etc. there is contradictory requirement of switching off supply to the areas affected by floods, shocks, fire etc. and restoring supply when these conditions subside. Hence the nature of actions to be taken varies from situation to situation, and calls for discretion and judgment by experienced engineers. With the present set up of control centers and operating personnel with vehicles, BEST is in a position to deal with these situations if necessary by diverting additional staff from non-emergency departments. This is possible, because Electric Supply Branch ensures that all the technical personnel are trained for emergency jobs, by a flexible transfer policy.

For enabling the control centers to arrive at the correct decision on action, it will be highly beneficial if the consumers are in a position to give information on the extent of supply failure, i.e. whether individual complaints or only their building is affected, or more buildings are affected or the entire area is affected. If the consumer gives wrong information, it may delay the restoration, as the different section personnel may get deployed for the job initially. In case of tripping in Receiving stations, the controls automatically gets information through the SCADA system, and Fault Engineer will move into action.

### 3.0 Co-ordinated functioning of various Control Rooms for faster restoration of Electric Supply

We have three types of Control Rooms viz. System / Supervisory Controls, Fault Controls and Fuse Controls. The schematic showing the movement of OFF Supply messages through these Control Rooms, to the respective sections which have to take actions for restoration of supply, is as follows -:

#### Co-ordinating functioning of various Control Rooms for faster restoration of Electric Supply

From the operational point of view, the Operation & Maintenance department of the Electric Supply Division of BEST is divided into five Zones viz. South Zone, Central South Zone, North West Zone, North East Zone and Central North Zone.

The main control rooms of Electric Supply Division are divided mainly into 2 controls, i.e. System Control in South zone covering the entire operations of the South & Central South zone from Colaba to Mumbai Central / Byculla / Haji Ali and Supervisory Control in North zone covering the entire operations of the North West , North East and Central North i.e. Haji Ali to Chunabhatti / Mahim / Wadala / Sion / Mumbai Central to Lalbaug –Worli. These two are the highest Control Centers, but as a routine, they look after only High Voltage system operations / breakdowns and reporting to management on all aspects of the system by taking input from other controls downstream.

These Controls are manned by the Super Controller (Superintendent / Asst. Engineer) / System Controller & Supervisory Controller (Dy. Engineers) respectively. They are assisted by Assistant Controllers (Charge Engineers). Both the Controller & Assistant Controller are working in all the three shifts round the clock. System / Supervisory Controller mainly deals with the communication with the Fault Engineers and Mains Engineers and reporting to Sr. Officers. Controller / Asst. Controller carry out the duties of receiving messages, writing messages and computerized reports and follow up with the operational staff and taking feedbacks. The Offices of Operation & Maintenance Departments are situated nearer to these Control Rooms in both the zones.

For restoration of Electric Supply, we have 8 (Eight) fuse Controls, 5 (Five) Fault Controls and 2 (Two) System / Supervisory Controls established and all details along with locations and telephone nos. are furnished.

All types of emergencies involving Receiving Sub-stations and Distribution Sub-stations are conveyed to the Fault Engineers working in all the three shifts through System Control & Supervisory Control

All other breakdowns and problems in the low voltage systems like supply failures, shock, fire, restoration of the off supply areas by giving temporary supply etc. are attended

by Mains Engineers who are deployed through Fault Controls in all the three shifts. The Fuse Control deploys Fuse men who can attend to supply failures due to blowing of fuses at meter rooms of the consumers, and problems connected with meters. They also take action in case of fire, shock, water falling at Service position etc. on the meter boards and in the installation. All the control rooms have the system of lodging all the messages received and feedback of attending the message is also recorded in the respective controls. There is a system of reporting all the major messages to the senior officers of the Electric Supply Branch, every morning and also during the working day and holidays round the clock.

For cases of OFF Supply durations exceeding 2 hours, there are well defined instructions for escalating the matter to senior officers, which are as follows :-

<b>OFF Supply Duration</b>	<b>Escalation</b>
2 to 4 Hours	Concern Assistant Engineer / Superintendent Engineer of respective O & M Department
4 to 6 Hours	Divisional Engineer of respective O & M Department
Above 6 Hours	Deputy Chief Engineer of respective O & M Department & other Senior Officers

The telephone numbers of various control centers, for electric supply restoration and emergency messages jobs of BEST, are given below. The last 4 digit numbers of these control centers are unique and hence can be remembered easily by contacting personnel.

**4.0 Contingency Plans for major failures:**

The Contingency Plans for faster restoration of electric supply in case of all the EHV feeders and Power Transformers, showing the network operations to be carried out, are well documented and are being updated time to time.

In case of major failures brought about by man-made or natural disasters, the priority will be for safe guarding the Distribution System to prevent shock, fire, etc. by switching off and isolating switch points wherever required, and restoration of supply to essential consumers like hospitals and municipal pumping station. A list of such essential feeders / consumers is attached as **Annexure – V**

**5.0 Preparations prior to Monsoon Season:**

As a precautionary measure, prior to start of the monsoon season the various activities are being carried out by Operation & Maintenance Department, in order to safeguard the Receiving Substation (RSS) and Distribution Substations (DSS) and the equipments therein. The list of such activities is given below:-

- i) As regards the ADP's, Distribution Transformers, Distribution Sub Stations and Receiving Sub Stations in low lying flooding areas.

- a) We have identified flooding prone areas and roads in our area of supply. In such areas when water level rises, electric supply is disconnected selectively in order to avoid loss of life due to electrocution. In this situation, continuous monitoring of water level is being done by our Controls in co-ordination with MCGM and Fire Brigade.
- b) After the water level recedes, electric supply to such areas is being restored in a gradual manner. List of identified low lying flooding prone areas is attached vide

**Annexure IX.**

In case of dilapidated substations which require repairs, are monitored continuously and in case of substation failure, alternate arrangements of supply restorations are made.

- ii) Roof cleaning of RSS and DSS.
- iii) Inspection of storm water drains of RSS and letters to MCGM for cleaning the same, if necessary.
- iv) Inspection of DSS where in previous year the problem of water leakages were observed and inform the same to Civil Engineering Department of the Undertaking.
- v) Provision of tarpaulin, Backlit sheets above the equipments wherever necessary.
- vi) Providing heaters in RSS where there is a problem of moisture absorption in the bus bar compartment of switchgears, to avoid flashover.
- vii) Advertisement in the local newspapers for precautions to be taken during the monsoon season of their installations and service position and the necessary information regarding the contact personnel about the registering the complaints to controls in their respective areas.

#### 6.0 **Stand-by arrangement of officers for emergency duties:-**

The Electric Supply Division is presently headed by Deputy General Manager (Electric Supply). He reports to the General Manager of the Undertaking. DGM (ES) is assisted by 1 AGM (ES) and 4 Chief Engineers viz. Chief Engineer (Maintenance & Works), Chief Engineer (Customer Care), Chief Engineer (Regulatory) & Chief Engineer (Planning). Most of the technical personnel in Electric Supply Branch get trained for emergency and maintenance activities. All the Senior Officials of Electric Supply branch of BEST, especially those heading the Operation and Maintenance Departments under them, are available for assistance round the clock and as we say in BEST, “ all officers are on duty for 24 hours “ The names and telephone numbers of officers of Operation & Maintenance departments, directly concerned with the restoration of supply in case of breakdowns and emergencies, are given in **Annexure – III.** The Names and Telephone nos. of A Grade Officers, who reside in City limits are given in **Annexure – IV.**

The Electric Supply Division is also having a plan for posting the officers in Grade A-4 and A-5, in addition to the officers posted at various Receiving Substations for 24 hours in case of emergency. The list of such ‘A’ & ‘B’ Grade officers is given in **Annexure –VI.** Telephone numbers of all the Senior Officers from AGM (ES) to Divisional Engineers are given in **Annexure – VII.** The list of Receiving Substations with phone numbers is given in **Annexure – VIII.** The ward wise identified low lying flooding prone areas are given in **Annexure – IX**

#### 7.0 **Co-ordinating Officers at MCGM Control Room in case of Disaster:**

The co-ordinating officer who will report to Disaster Management Control (DMC) Room of Municipal Corporation of Greater Mumbai at their Headquarters and who will be coordinating with BEST Officers, are as follows:

<b><u>DISASTER CONTROL BOOKING – 2025</u></b>				
<b><u>Co-ordinating Officers :</u></b>				
Sr.No	Name	Designation	Department	Office Nos. / Mobile No
1.	Shri. B. S. Kamble	Asst. Engr.	Customer Care 'B' Ward	9869034874 22799541
2.	Shri. P. C. Rane	Asst. Engr.	Customer Care 'E' Ward	8356855849
3.	Shri. T.N. Shekokar	Asst. Engr.	Erection (S)	9967538721, 23711943 Ext. 701
4.	Shri. A.B. Shinde	Supdt.	Kussara (Workshop)	9869454302 9082727482
5.	Shri. V. R. Mali	Supdt.	TIE	9757110334

#### 8.0 **Protocol for activating Disaster Management Plan:**

It can be seen that BEST is an organization well prepared to meet all types of emergencies. One can be sure that Electric Supply Wing of BEST will carry out whatever is expected of it, as dictated / compelled by the nature of the disaster and the needs of the situation.

The message received from the Disaster Management Control Room of MCGM or from any other agency to the System/Supervisory Control will be conveyed immediately to the Operational Staff for their action and to the Senior Officers of Electric Supply Division. The details of message and timing of receipt of message will be lodged in respective Control Rooms.

Depending upon the nature of emergency such as fire, flood, collapse of dilapidated building due to heavy rain etc., the fault engineers, mains engineers, will rush to the sites and the 'A' Grade Officers in-charge as mentioned in **Annexure –IV** will take charge of the situation at site for giving necessary instructions to the staff. The main function of this staff at site is to switch off the electric supply of the affected areas in order to avoid further damages. The Officers at site, i.e. Fault engineers, Mains engineers will be always in co-ordination with the respective Control Rooms with wireless sets fitted in vehicles, static Wireless sets in Control Room, walky-talky etc. Depending upon the severity of incidence, the emergency officers mentioned in **Annexure-VI** will be booked at the respective RSS, fault controls and fuse controls for co-ordination with the operating staff and the consumers.

During the emergency the System Control Room in South zone and Supervisory Control Room in will be headed by the Dy. Chief Engineer (Distribution South) and Dy. Chief Engineer (Distribution North) respectively who will have the overall control over the Control Rooms and operation of the staff. They will be also in contact with the Police, Fire brigade and MCGM authorities for their help. The Divisional Engineers of non-emergency department like Erection, Construction divisions will have a monitoring role during the emergency over the operations of the staff under their divisions. The vehicles of these divisions will also be utilized for emergency duties after attending the emergencies; the necessary feedback will be given by Operational Staff to the Control Room, which will be conveyed to all Senior Officers of Electric Supply Division and the General Manager. The next step will be the restoration of the electric supply, whenever the situation is normalized.

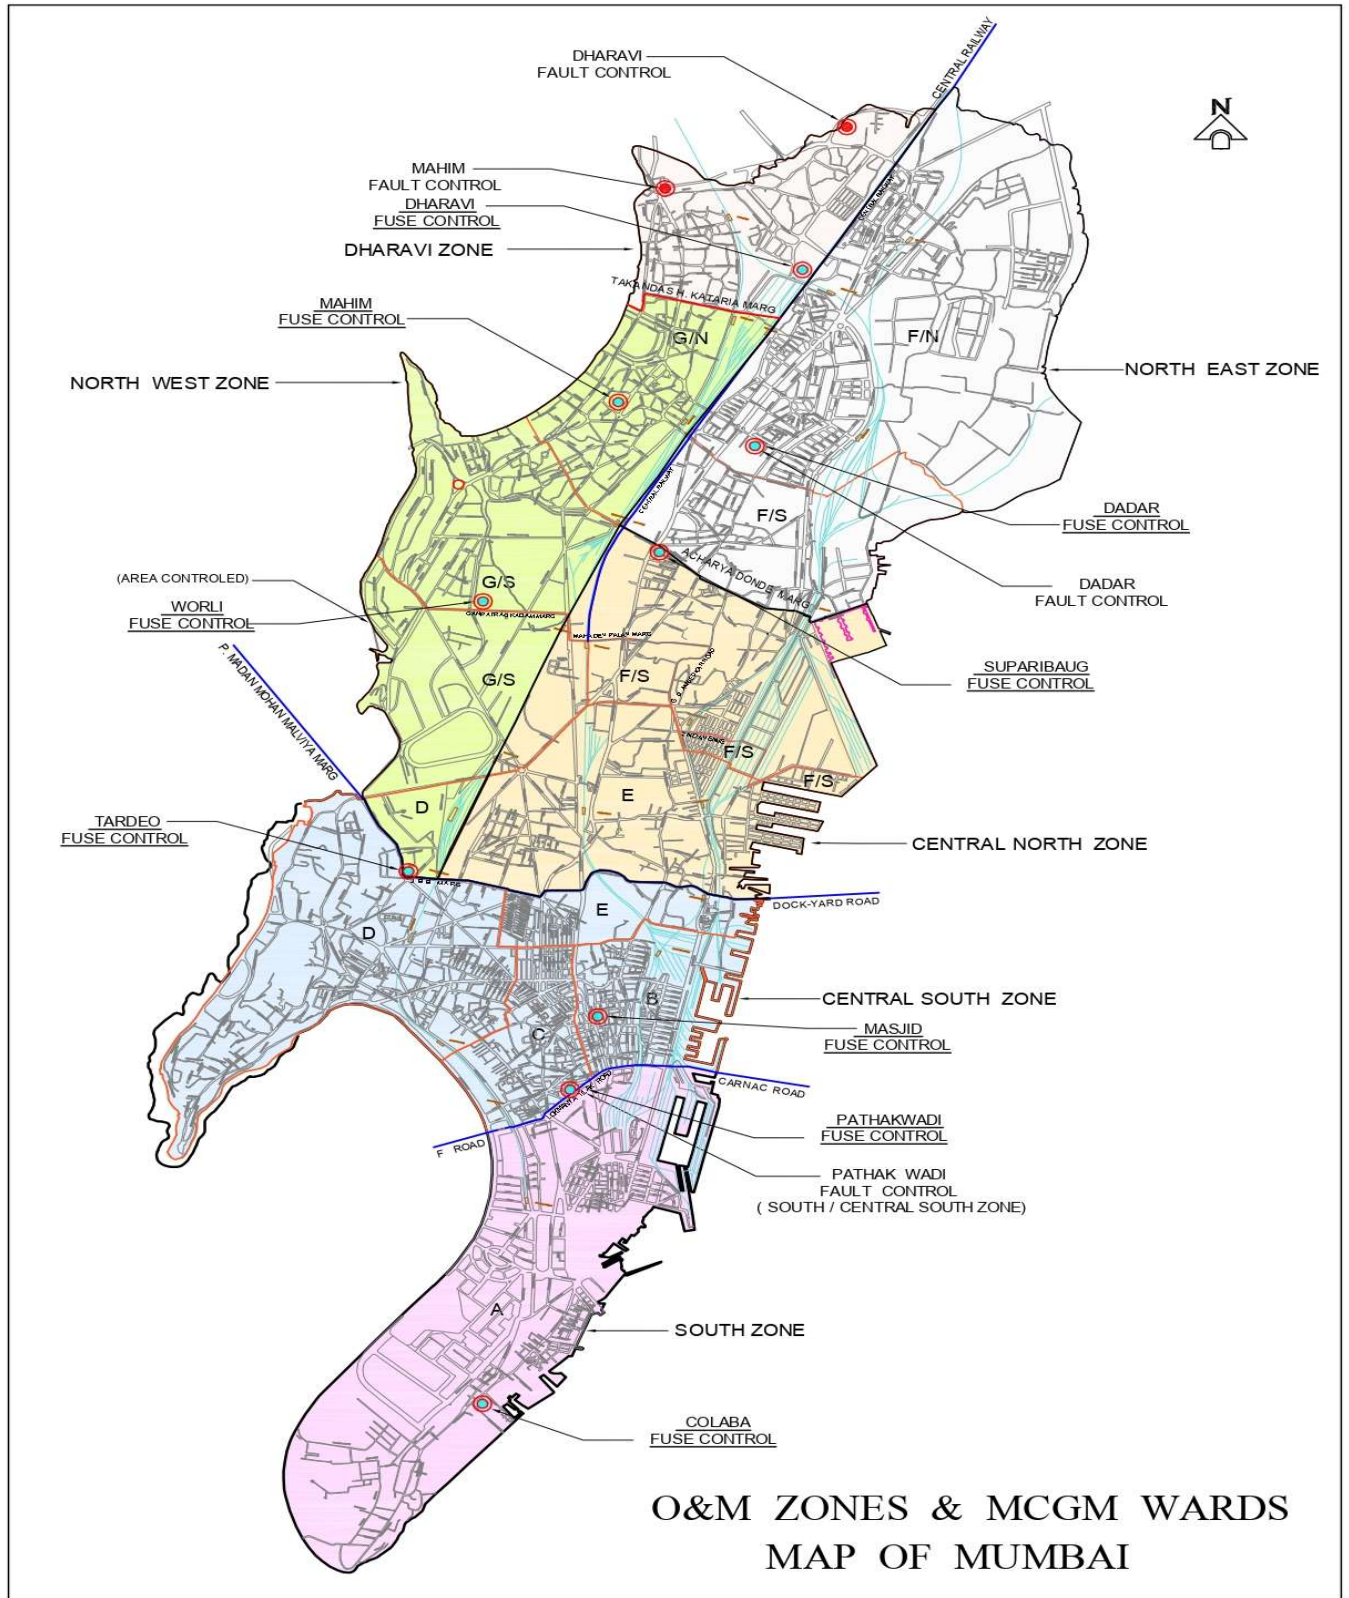

## 9.0 **Communication**

Communication is one of the important aspects in any Disaster Management. All the 65 RSSs are provided with MTNL Telephone Lines. The Supervisory Control, System Control & Fault Controls are provided with MTNL, Tata telephone lines, the static wireless sets and hot lines. The emergency vehicles are fitted with wireless sets. Walky-talky sets are also provided to Fault Engineers & Mains Engineers.

## 10.0 **Redundancy**

The redundancy in the electrical system is required to be built so that enough spare capacity is available whenever there is a non-availability of equipment and cables, due to faults or outages due to normal maintenance. The Electric Supply Division has its norms well defined in order to maintain the reliability of the Electric Supply. The sufficient redundancy is provided in HV / LV networks in order to transfer the loads and to minimize interruption of supply. This is achieved by the optimum loading of distribution and power transformers keeping down the low distribution loss. The Electric Supply division is also maintaining the sufficient stock of various equipments, which are being utilized in case of emergency for replacement of faulty equipments for distribution of electricity to the consumers. Depending upon the consumption level, the tenders are invited for procurement of various types of equipments annually or biennial.

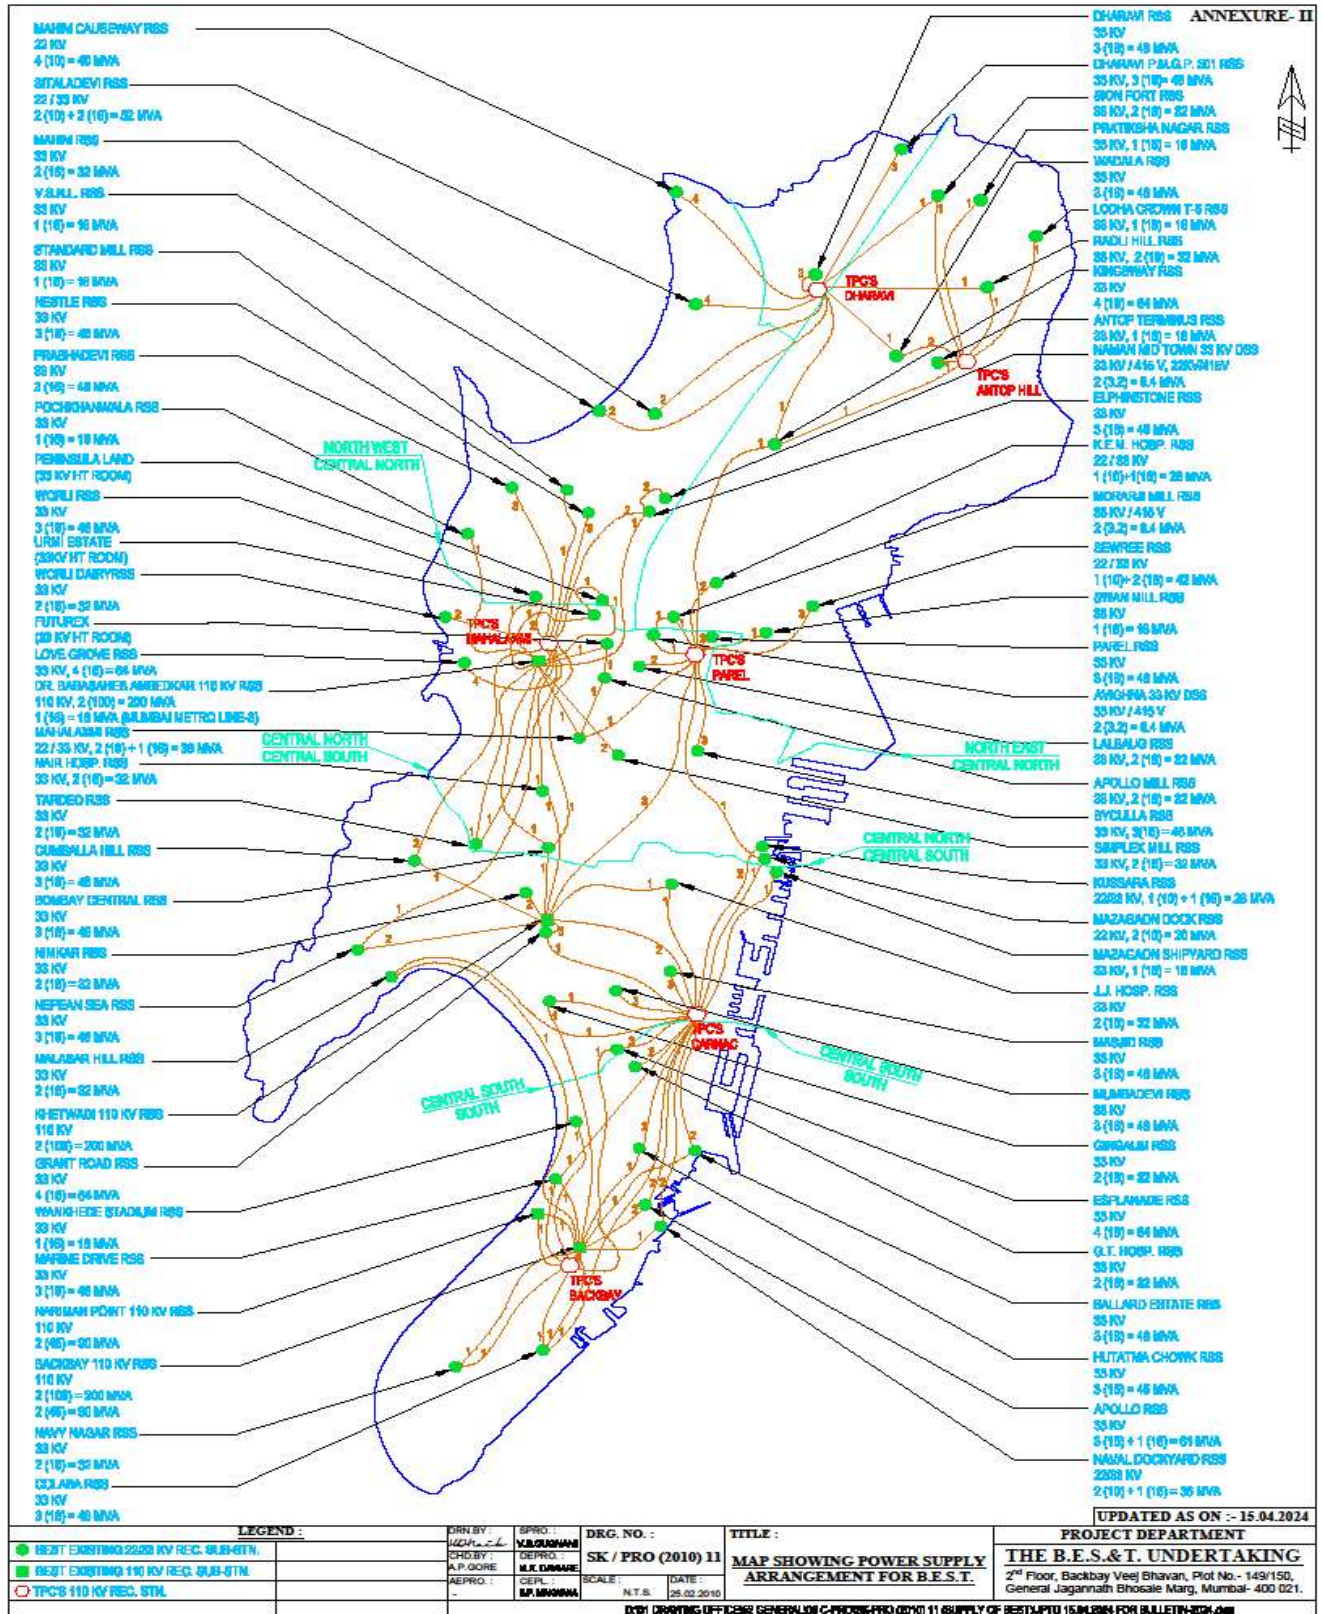

However, in the event of any tripping of Tata Power Generating Units or failure of any EHV Transmission Lines feeding BEST's Distribution Network in Island City of Mumbai, there may be electricity supply failure in the BEST's area of supply for certain duration.

# ANNEXURE-II

**ANNEXURE - III****List of Officers in Operation & Maintenance Divisions**

Name	Designation	Telephone No		Responsibility
		Mobile	Office
